About me

I'm Sérgio Oliveira, a Full Stack Developer with focus on building modern, responsive web applications. I'm currently studying Systems Analysis and Development, where I'm learning how to design scalable systems, work with databases, and improve software architecture.

My journey in tech started with logic and algorithms, and since then I've grown by building applications that solve real problems. In my portfolio, you'll find projects developed with ReactJS, NextJS, NodeJS, Tailwind CSS, SQL, and NoSQL — always with attention to clean code, usability, and performance. I also have solid experience with HTML, CSS, and Styled-components, creating interfaces that are both functional and visually appealing.

I'm always looking to improve. Every project I build is a new opportunity to learn something, face new challenges, and go a step further. I enjoy working in teams, sharing knowledge, and turning ideas into real solutions that make a difference.

Now, I'm looking for an opportunity to join a team where I can grow, contribute with my skills, and keep building great things.

Projects

Full Stack Developer

[Tech Solutions](#) | August - 2024

Landing Page development following Figma template and containing several sections with modern design using Vite + ReactJS, Styled-components, React-router-dom.

[Ticket Management](#) | December - 2024

I developed a ticket management platform for Sprints, which allows creation, viewing and editing according to user (admin) permissions. The API, built with Node.js following the MVC architecture, integrates several technologies such as Vite + ReactJS, TailwindCSS, Express, Sequelize, PostgreSQL, JWT and Docker, ensuring a continuous and scalable workflow.
