About me

I'm Sérgio Oliveira, a Full-Stack Developer focused on creating modern, scalable and responsive web applications. I have solid experience with HTML, CSS, JavaScript and frameworks such as ReactJS and NextJS, as well as using tools such as Tailwind CSS, NodeJS and SQL and NoSQL databases.

I'm currently studying Computer Engineering, which is helping me understand software architecture, best practices and systems engineering. My focus is on creating high-performance interfaces with good user experience and clean code, always thinking about scalability and maintenance.

I'm looking for opportunities in collaborative environments where I can apply my knowledge, grow professionally, and contribute to high-quality technical and visual results.

Projects

Ticket Management December - 2024

Platform for ticket management with authentication and permission control. API built in Node.js, following an MVC architecture.

Tecnologias: *React(Vite), TailwindCSS, Express, Sequelize, PostgreSQL, JWT, Docker*

BurgerShop October - 2024

Full-featured online burger shop e-commerce platform with order processing, user authentication, and Stripe payment integration.

Tecnologias: *React (Vite), Node.js, PostgreSQL, Sequelize, JWT, Multer, Stripe API*

Tech Solutions August - 2024

Modern landing page based on a Figma template, featuring multiple sections and a responsive design

Tecnologias: *React (Vite), Styled-components, React Router Dom.*
