About me

Hello, my name is Sérgio Oliveira. I am a Full Stack Developer currently living in Portugal. I am proactive and value an organized approach to tasks and studies to deliver optimal results. Relocating to Portugal to study programming has allowed me to align my goals and ambitions in this field.

I started exploring JavaScript and have since gained experience with tools such as React, Git, Figma, TypeScript, Node.js, Styled-components, as well as gaining experience in SQL and NoSQL. To tackle more complex projects, I am continually improving my modern development skills for frameworks such as Next.js, Tailwind, Vite, Prisma and others. I am passionate about learning and curious by nature, as I believe that knowledge is the key to solving problems and overcoming challenges.

I maintain effective communication with my colleagues, which contributes to transparency in understanding the project's needs, promoting efficiency and trust. This mindset helps me build a collaborative and productive environment where I can support and rely on my team whenever necessary.

Projects

Software Developer

Tech Solutions | Agosto - 2024

Developed a Landing Page for Virtual Headsets using ReactJS and styled-components. This project involved creating multiple sections, images, buttons, input fields, and interactive cards, making it a significant challenge.

Ticket Management | Dezembro - 2024

Built a ticket management platform enabling users to create, view, and manage tickets with text search and status filters. Features include user registration (name, password, and department). Technologies: HTML, JavaScript, TailwindCSS, ReactJS, SQL, NodeJS, and Docker.

Education

Dev Club

Full Stack Developer

Universidade
Veiga de Almeida

Bachelor's Degree:
systems analysis and
development
